Call to participate in the European Parliament election

Europe needs allies. Only a united Europe is able to secure peace and freedom. The European Parliament Election provides the best opportunity to support Europe. Taking part in this election is a commitment to the importance of a united Europe. The European Parliament receives a strong legitimation by a high turnout. Only an impressive turnout can be a sign for a successful democracy.

We European marksmen and markswomen declare our support to Europe. We know that Europe needs to grow closer faster and better to secure protection and prosperity, peace and freedom. This process of agreement has been halted by crises and tensions. A European unification can only be achieved when identity and cultural diversity are preserved. This is what we learned during the diverse personal meetings: It is the differences that enrich our togetherness. The mutual awareness remains a crucial factor of unity.

Our engagement for peace and freedom in Europe relies on international understanding, needs democratic structures, lives the Christian conception of caring interaction. We have one wish for Europe: to achieve what we marksmen and markswomen achieve during our meetings and festivals, to unite people and make them friends.

We are proud of our common marksmen ancestor's achievements with regards to the development of our values and their continuation into today's society. With our democratic system, we also take responsibility for the coming generations, as their engagement for faith, custom and home may determine the future.

This is why we call to participate in the European Parliament election.

Europe needs every voice of reason!

For us! For our children! For our grandchildren!

For a future with Europe in peace and freedom!
